Emory - TTO Mission Statement

We support the University's mission through comprehensive management of Emory innovations to maximize the benefit to the University and to humanity.

www.autm.net

Emory IP Policy

- Policy 7.6 Intellectual Property Policy
- **Responsible Official:** VP for Research Administration **Administering Division/Department:** Technology Transfer **Overview**
- Emory encourages faculty to pursue areas of study of their choice, to share the results of their intellectual efforts with colleagues and students and recognizes their need to retain traditional academic freedoms in the conduct of scholarly and scientific work. Although the University does not undertake research or developmental work principally for the purpose of commercial application, patentable inventions and other commercializeable works sometimes result from the activities carried out by Emory Personnel. To address these needs and support the University's mission and its commitment to use knowledge to improve human well-being, the University has established this Intellectual Property Policy.
- Applicability
- This policy applies to all Emory personnel, and in specific circumstances detailed within this policy, visitors and students.

www.autm.net

Emory IP Policy (cont.)

- 7.6.01 Ownership of Intellectual Property
- Emory University owns all Intellectual Property created or developed by Emory Personnel that is related to the Emory Personnel's normal duties (including clinical duties), course of studies, field of research or scholarly expertise, or was made with the use of Emory Support. All Emory Personnel hereby assign their rights in any such Intellectual Property to the University.

University Objectives in a License

- Primary Goal: Making the technology available to the public
- Milestones are included to verify diligence by licensee toward commercialization
- Emory desires a fair commercial return; timing and form of the return can be tailored appropriately
- Licensee must pay associated patent costs and costs of doing business (eg., liability insurance, enforcing patents, etc.)

www.autm.net

Components of a License Agreement

- License fee
- Financial support for continuing research
- Designation of exclusive or non-exclusive rights
- Geographic territory
- Field of use limitations
- Schedule of royalty payments
- Minimum royalties or other due diligence clauses
- Reimbursement for patenting costs
- Publication policies
- Time period
- Confidentiality
- Use of Emory's name

www.autm.net

How does the University Obtain Value in a License?

- Upfront payments (cash, stock, research support, past patent costs)
- Reimbursement of ongoing patent costs
- Milestone payments
- Annual minimum royalties
- Sublicense income sharing
- Earned royalties

www.autm.net

Things We Argue About the Most

- Surprisingly, it isn't necessarily financial terms. A lot of time is spent on:
 - Diligence Milestones
 - Scope of Field to be Licensed
 - Improvements
 - Certain legal language associated with reps/warranties, insurance, patent control and enforcement

www.autm.net

Stakeholders

- The Inventor
- The Department
- The College
- The University
- The State
- The Nation
- The World
- Industry

www.autm.net

Stakeholder Conflicts

- Dollars vs. Deals
- Royalties vs. Research Funds
- Patents vs. Publications
- Startups vs. Established Licenses
- Licensees in Georgia vs. Other States
- Access in Developing Countries

Conclusion

- Just get deals done and good things will happen!
- Success takes time and it may never pay for itself
- Technology transfer is expensive, it is risky, it is impactful, and it is our duty!
